

KiddyKeys® teaches keyboard concepts, general music concepts, and music appreciation in energetic, fun and memorable ways. Educating the whole child is the goal of every class. **Books, games, manipulatives and songs with motion** appeal to individual learning styles. Students will **play the keyboard and rhythm instruments** several times in each class and will progress through keyboard basics like note values, key names, hand position and finger numbers.

KiddyKeys® has many benefits for your child! **In class we will:** engage small muscle and large muscle coordination; encourage creativity; teach discipline and cooperation; gain exposure to symbols and foreign language; study patterns and spatial relationships; and have active fun as we learn! Most importantly, we will begin to love and understand music.

Research shows that music study - especially keyboard - engages the entire brain like no other activity. **Every day contains music - begin a lifetime of enjoyment now!**

Tuition is \$40/month; class size limited to 6 students.

Keyboard Kamp is an introduction to keyboard/piano, teaching students what they need to know to **start playing music at the keyboard:** keyboard layout, rhythm, and music notation, plus introduction to easy songs they can play. An introduction to improvisation will help students think creatively at the keyboard. Worksheets, games, and manipulatives keep the class varied, active, and fun. **Students need a full-sized keyboard or piano at home.**

Keyboard study is proven to have many benefits to the growing child. Music ignites all areas of child development: intellectual, emotional, motor, language, and overall literacy. It helps the body and the mind work together, and it provides hours of enjoyment creating beautiful music!

Tuition is \$80/month; class size limited to 4 students.
